## Professional Summary

Results-driven Software Development Engineer with 3 years of experience in Java Full Stack development, specializing in building scalable web applications using Spring Boot and React.js. Proficient in developing RESTful APIs, integrating front-end and back-end systems, and delivering high-quality, maintainable code. Strong understanding of software development life cycle, agile methodologies, and collaborative team environments.

## Skills

- Java 8/11/17
- Spring Data JPA
- Spring Boot 2.x.x/3.x.x
- JavaScript/React JS
- Microservices
- Postgresql
- Spring Cloud/Security
- Kubernetes/Docker

## Tools/Technology Used

- Junit and Mockito
- Maven
- SonarQube/SonarLint
- JFrog
- Agile Methodology
- BlackDuck
- Jenkins
- Jira/Confluence
- Postman
- GitHub
- REST
- VSCode/Eclipse/IntelliJ

## Educational Attainment

### College of Engineering (CGPA 9.91)

Bachelor of Technology (B.Tech) in Computer Engineering

July 2018 – July 2022

Pune, Maharashtra

## Work Experience

### Mercedes-Benz Research and Development India

Software Engineer

April 2023 – Present

Bengaluru, Karnataka

- Collaborated effectively with cross-functional teams to ensure on-time delivery and client satisfaction.
- Dedicated to maintaining high code quality through unit testing, code reviews, and continuous improvement practices.
- Collaborative team player, ensuring project alignment and timely delivery
- Executed routine code reviews, debugging, and problem resolution, ensuring consistent peak performance and system stability.
- Collaborated using Jira for sprint tracking and Confluence for documenting design decisions and sprint retrospectives.

### Capgemini India

Software Engineer

August 2022 – March 2023

Chennai, Tamil Nadu

- Involved in the analysis, design, coding, modification and implementation of client requirement.
- Practiced Agile methodology with 2-week sprints, daily stand-ups, and regular demos to track feature progress and gather feedback.
- Involved in sprint planning to estimate tasks, prioritize backlog items, and define sprint goals.
- Creating design document and maintaining developer notes in Confluence.
- Strong team player, ensuring project alignment with business goals and contributing to a productive agile environment.

## Project Experience

### Compliance Dashboard (CDash) | Java 11/17, Spring Boot 2.x.x/3.x.x, Cloud, Maven, PostgreSQL

- Developed and maintained 100+ RESTful APIs to support efficient data processing and seamless front-end integration.
- Improved application performance and scalability by 30 per. through the implementation of Spring Boot microservices with Eureka and API Gateway.
- Automated CI/CD pipelines using Jenkins and managed application deployment and scaling using Kubernetes, ensuring smooth and efficient release cycles.
- Built 50+ reusable, responsive UI components using React.js, adhering to coding standards and applying DRY (Don't Repeat Yourself) principles.
- Used SonarQube for code coverage, bug fixes and code smell fixes and maintained structural validation.
- Delivered user stories as per the sprint plan. Working in client location to understand the business requirements for the delivery.

### Splitwise (TTMM Split & Settle 🔄) | React, Redux Toolkit, JavaScript

- Built with React and Redux Toolkit, implementing global state management for users, expenses, and trips.

- Used code splitting and React.lazy with Suspense to enable lazy loading of route-based components for optimized performance.
- Structured using feature-based modular architecture, improving code maintainability and scalability.
- Ensured responsive design and smooth UX using React Router DOM, custom hooks, and conditional rendering.

### E-Commerce Website (*Swabhimān Marāthi Sanskrutichā* 🌐) | *Spring Boot/Security, Swagger, Razorpay, AWS*

- Implemented a full-featured e-commerce store with functionalities including product listing, user authentication, shopping cart, and order management using Java Spring Boot and React.js.
- Integrated Razorpay payment gateway for secure and seamless online payments with real-time status handling.
- Implemented email notifications (order confirmation, payment status) using JavaMailSender and dynamic templates via Thymeleaf.
- Supported guest checkout using stateless JWT authentication generated from shipping details.
- Deployed the application on a cloud Linux VPS using Nginx as a reverse proxy and systemd for service management.
- Automated deployment scripts and ensured HTTPS configuration using Certbot (Let's Encrypt).

### Achievements / Certifications

---

- **Project Star Award** – Recognized for outstanding contribution and delivery excellence in a critical client project.
- **Java Ocean Certified** – Validated expertise in Java programming and backend development practices.
- **Microsoft Azure AZ-900 Certified** – Demonstrated foundational knowledge of cloud concepts, services, and Azure architecture.
- **Personal Projects** – Worked on real-world, production-ready use cases involving payments, authentication, dynamic data, and API integration.

### Personal Details

---

**Date of Birth:** 19 Jul 2000

**Full Name:** Pratik Subhash Deshpande

**Alternate Email:** pratikdeshpande65@gmail.com
